*Extended to the highest frequency of this dimension, 50,000.

Note ** Between Sapiens and Spiritus, these levels of Consciousness point to different values depending on Level of Intention. At an Intention of 1,000 (Hawkins Map of Consciousness suggests that a frequency of 600 points to a level encompassing *Peace*), with an Intention of 2,000 it points to (*Willingness*), with an Intention of 5,000 (*Courage*) and with an Intention of 10,000 (*Arrogance*). So, by itself, Level of Consciousness means nothing unless you also know their Level of Intention. Also, prior to about 1930 there were only occasional Spiritus (such as Leonardo di Vinci, Abraham Lincoln, Frank Lloyd Wright or the fourteenth Dalai Lama)

Note 1: Each of the levels of Intention noted above is a gate. When you reach the next gate, your Level of Consciousness will end with a zero (example = 2,000). When you begin to open to new material that comprises the next level, you move through the gate and your Level of Consciousness will end with a one (e.g. 2,001). There is no "doing" which will help you through the gate. There is only opening to what comes to you.

Note 2: Most Homo-Spiritus have a Sacred Contract or incoming Level of Intention within one point of a gate. For Instance, high-level Indigos have an incoming Intention of 10,000 and beginning Crystals have an incoming Intention of 10,001. Both will have some characteristics of the other. It is not unusual for otherwise identical twins to be born one point apart (one as an Indigo at 10,000 and the other as a Crystal at 10,001)

Note 3: Whether a child is born as an Indigo or as a Crystal is no consistent measure of the level of Consciousness of the soul or what level the life/role is designed to complete. It is more a matter of what the life/role requires to complete it's assignments, and style of action of the soul. If the soul experiencing the life/role is basically a thinker/doer and the life/role requires a lot of energy then the role will be designed as an Indigo. If the role is one which requires focus and interspection then the role is designed to be a Crystal and the style is more of being/feeling. A soul who is closer to the center between thinking and feeling has more freedom to choose the roles they need, but may also swing between the two to gain broader experiences. Experiencing roles which are different from the orientation of the soul may cause some minor negative frequencies to develop which the Soul would then have to clear at some later point.
